

Enhanced Installation Components

The range of Keylite enhanced installation components aim to make the Keylite Roof Window increasingly more watertight from the moment they are applied.

Felt Collar

The Keylite Felt Collar (FC) is manufactured from a flexible material that creates an impenetrable seal around your roof window and unites with the underfelt of your roof to ensure a watertight seal.

Vapour Collar

The Keylite Vapour Collar (VC) enhances the air tightness around your Keylite roof window, as well as preventing vapour passing through your roof construction.
